

**February 5, 2022**

**PCR 238 – AGIIS API INTEGRATION to MyAgGateway (AgGateway’s Association Management System)**

To help streamline the AGIIS billing process and help facilitate AGIIS reporting, PCR 238 was implemented on February 5, 2022. This solution integrates MyAgGateway’s API’s into AGIIS for certain fields already in AGIIS prior to the enhancement, as well as additional data elements added as part of this enhancement. On a nightly basis, AGIIS will capture the data elements in AGIIS listed below and populate them within MyAgGateway (New data elements added to AGIIS because of this PCR are indicated below):

One requirement of this enhancement is to display a subscriber’s Authorized Vendor name and contact information so that it can be pushed into MyAgGateway. To accommodate this request, a new data table, AUTH\_VNDR was created to capture Vendor Name, Contact Name and Email Address. A new link was added to the AGIIS Administrator menu named “Authorized Vendors.” There is also a new Search page, Results page, and Add/Edit page to support this functionality.

1. AGIIS Active/Inactive Flag
2. GLN – Global Location Number
3. Subscriber Type
4. AGIIS Business Name
5. AGIIS DBA Name
6. AGIIS Primary Contact
7. Primary email address
8. AGIIS Secondary Contact
9. Secondary email address.
10. Subset Size (Small, Medium, Large) – **New Data Element**
11. GLN Subset Count
12. EBID Subset Count
13. Authorized Vendor Name – **New Data Element**
14. Authorized Vendor Contact – **New Data Element**
15. Authorized Vendor Contact Email Address – **New Data Element**
