

AGIIS Enhancements

PCR 249 - Change Password Feature Enhancement May 20, 2023

On Saturday, May 20, AGIIS was enhanced to support a new "Change Password" feature. The User Profile page was updated to remove the "Password" and "Confirm Password" fields and a "Change Password" button has been added at the bottom of the page. The new functionality can be found by clicking on the "Administration" then the "My Profile" menu as shown below.

From the User Profile page, you will notice the "Password" and "Confirm Password" fields have been removed and a "Change Password" button has been added.

User contact details

Subscriber: AGGATEWAY CORPORATION Phone: (913) 469 - 8700
First Name: CHRIS Email Address: ccrutchfiel2@dx.com
Last Name: CRUTCHFIELD Address:
User ID: CHRISC City:
State/Zip:

Removed Password and Confirm Password Fields

[Redacted password fields]

Preferred Product View: Classic 3 Level Hierarchy Flat Product/GTIN

Is granted the following privileges:

- E-Business - Manage Subset
- E-Business - Request Add
- E-Business - Request Update
- E-Business - Search/View
- Entity - Manage Extracts

Subscriber Contact

Is Subscriber Contact
 Is primary contact
 Is secondary contact

Active Status

Is Active

Send e-mail notification for the following events:

- System Receives Request
- Request is Accepted
- Request is Declined
- System Generates Extract File
- Product Alert

Subscriber Administrator Information:

Name: BISLA ,AMIT
Email Address: kcbpo_csc_ecomm_agiis_developers@dx.com
Phone: (454) 654-5646
Name: BOKKA ,CHIRAN
Email Address: chiranjevi.bokka@dx.com

Ignore warnings

Added Change Password Button

To change your password, simply click on the "Change Password" button. The "Change Password" screen will be presented as shown below. Simply type your new password in the "New Password" and "Confirm Password" fields. Once saved, an automated email will notify you that your password was changed.

Change Password

User ID: CHRISC
New Password:
Confirm Password:

When adding a new user, Subscriber Administrators will have the ability to establish a temporary password by completing the "Password" and "Confirm Password" fields on the User Profile page as shown below. New users are encouraged to use the new functionality to make their password unique.

The screenshot displays the 'User Profile' page in the AgGateway AGIIS system. At the top, there are logos for AgGateway and AGIIS, and navigation links for HOME, LINKS, SEARCH, FILES, ADMINISTRATION, and HELP. The user is identified as C. CRUTCHFIELD - AGGATEWAY. The main form is titled 'User contact details' and includes the following fields: Subscriber (AGGATEWAY CORPORATION), First Name, Last Name, User ID, Password, Confirm Password, Phone, Email Address, Address, City, and State/Zip. Below these fields, there are options for 'Preferred Product View' (Classic 3 Level Hierarchy selected) and a section for 'Is granted the following privileges' with a list of checkboxes. To the right, there are sections for 'Subscriber Contact' (Is Subscriber Contact, Is primary contact, Is secondary contact) and 'Active Status' (is Active checked). At the bottom, there is a section for 'Send e-mail notification for the following events' with a list of checkboxes, and navigation buttons 'Submit' and 'Back' are located at the bottom left, and 'Ignore warnings' is at the bottom center.

The following AGIIS enhancements were implemented on March 25, 2023.

PCR 245 – AGIIS Product Directory Modification – Indicator Digit

This enhancement is the result of a recommendation by AgGateway Working Group 16, Crop Protection Product Guidelines. The Working Group's recommendation is to move away from a Package Level Indicator Code and move toward an Indicator Digit which is supported by GS1 Standards. This enhancement will only impact subscribers loading products into AGIIS.

Prior to this enhancement, the first digit of the GTIN 14 in AGIIS was referred to as a package level indicator code. Codes available for assignment were limited to the following:

- 0 - lowest saleable unit
- 2 - mutually agreed upon (To identify a container less than intermediate and above smallest consumer unit)
- 3 – interim package
- 4 - mutually agreed upon (To identify a container smaller than standard shipping container and greater than intermediate)
- 5 - standard shipping container
- 7 – standard pallet
- 8 – repack
- 9 – non-standard bulk

With this enhancement, AGIIS will be modified to use indicator digit logic instead of a package level indicator code. Modifications will be made to all places a GTIN is enumerated or calculated in AGIIS. This includes the web interface, web services and bulk processes. There will also be changes to web page verbiage, page level help and documentation.

The Indicator Digit logic will allow product owners to utilize an indicator digit of “0” – “9” for the creation of the GTIN with no restrictions or definitions as shown below. It will be up to each manufacturer to determine their own hierarchy, but should be applied consistently across all product lines.

PCR 246 – AGIIS Address Line 1 System Edit Addition

AGIIS Line 1 System Edit Addition enhancement will ensure that entities added to the Directory via website, bulk process, or web services, will contain **address only** information in line 1 of the physical and mailing addresses. This enhancement was recommended by an AGIIS subscriber to help address confusion when address line 1 contains a grower name, or other non-address information.

This enhancement will ensure that address line 1 (physical or mailing) contains numeric digits, with the exception being, “C/O”, to designate “in care of”, which is often used within the Crop Protection industry to enumerate warehouse and storage locations.

With bulk submissions files, when address line 1 contains non-address information, return files will include a new error code, **S308** with the description, **“Address line1 contains non address information.”**

When adding or updating an entity using the web interface, if non-address information is identified in address line 1 (physical or mailing) the warning message, "Address line 1 contains non address information", will be presented.

When this error message displays, the checkbox, "Ignore name and/or address warnings" will also be presented. If a user contends that the information in line 1 should be allowed in the directory, this box can be checked, causing the Add or Update transaction to be routed to the Directory Administrator for review. When doing so, it is recommended that comments are added to help the Directory Administrator make a determination.

In the example below, "Travis Hogan" is entered in line 1 of the physical address. The error message is presented along with the, "Ignore name and/or address warnings" checkbox. The user should either enter the address, "1 Arrowhead Dr" in line 1, and resubmit, or may check the checkbox, add comments, and submit to the Directory Administrator for review.

Address line 1 contains non address information.
